DETAILED ACTION

Drawings

The drawings are objected to because the lines, numbers and letters are not uniformly thick and well defined, clean and black (poor line quality) in Figures 1-17. Additionally, the numbers and reference characters are not plain and legible in Figures 1-17. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The abstract of the disclosure is objected to because of the inclusion of legal phraseology, i.e., "Said collectors". Correction is required. See MPEP § 608.01(b).

The specification is further objected to because the customary U.S. patent headings are missing, i.e., "Background of the invention," "Brief Description of the Drawings," etc.

Claim Objections

Claim 1 is objected to because of the following informalities: In line 4 of the claim, "a" should be inserted prior to "pivoting arm." Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, line 6, the recitation "which is embodied" is vague and indefinite. In claims 2, 3 and 6, there is no antecedent basis of the draining station to comprise a plurality of "door elements." In claims 4 and 7-9, there is no antecedent basis of the draining station to comprise a plurality of "pivoting arms."

Allowable Subject Matter

Claims 1-9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
